

### 10 Watts

- Output Voltages from 100V to 12kV
- Output Voltage Proportional to Input
- Low Turn-on Voltage 0.7VDC
- Input to Output Isolation
- Dual Output Option
- Arc & Short Circuit Protected
- No Minimum Load
- 3 Year Warranty

The F Series is a broad line of robust, field-proven DC to HV DC converters which deliver 10 Watts continuous output power. Outputs range from 100V to 12kV. The input and output are galvanically isolated so a unit can be used to deliver a positive or negative high voltage output. The output voltage is proportional to input voltage with a low 0.7V typical turn-on voltage.

The F Series employs a quasi-sinewave oscillator, a fully enclosed transformer, input and output filtering, and a 5-sided metal enclosure. As a result, these modules exhibit very low EMI/RFI, noise and ripple. A dual output option has a center-tap pin which, when grounded provides both positive and negative outputs from one compact module.

#### Dimensions:

**F Series:**  
2.80 x 1.70 x 0.85" (71.1 x 43.2 x 21.6mm)

#### Key Applications:

- Mass Spectrometry
- Electrostatic Chucks
- Electrophoresis
- Capacitor Charging
- Particle Counter
- Isolation Testing
- Medical Laser Treatment

#### Input

Characteristic	Minimum	Typical	Maximum	Units	Notes & Conditions
Input Voltage	0.7		12, 15	VDC	See Models and Ratings Table.
Input Current, No Load			500	mA	
Input Current, Full Load			1.5	A	

#### Output

Characteristic	Minimum	Typical	Maximum	Units	Notes & Conditions
Output Voltage			12,000	VDC	See Models and Ratings Table
Output Current			100	mA	See Models and Ratings Table
Output Voltage Tolerance		+5, -5		%	At Max Vout, Full Load
Minimum Load	No minimum load required				
Regulation	Unregulated, Output is proportional to Input. See Application Notes.				
Short Circuit Protection	Protected against short circuit conditions indefinitely.				
Ripple and Noise	0.1		2.5	%	See Models and Ratings Table.
Response Time			260	msec	0 to Max Vout, Full Load

#### Notes

1. Maximum rated output current is available at maximum rated output voltage and derates linearly as input voltage is decreased.
2. Output voltage is load dependent. Under light or no-load conditions, reduce the input voltage so maximum rated output voltage is not exceeded.
3. Specifications after 1 hour warm-up, full load, at 25°C unless otherwise indicated.
4. Proper thermal management techniques are required to maintain safe case temperature at maximum power output.
5. Ripple specification for center-tapped units applies to the voltage between the positive and negative output terminals.

### Environmental

Characteristic	Minimum	Typical	Maximum	Units	Notes & Conditions
Operating Temperature (case)	-10		+70	°C	Standard operating temperature
Storage Temperature	-25		+90	°C	
Humidity			95	%RH	Non-condensing
Cooling					Natural Convection

### General

Characteristic	Minimum	Typical	Maximum	Units	Notes & Conditions
Isolation: Input to Output			3,500	V	< ±3,500 Bias for Models F01 to F60
Isolation: Input to Output			500	V	< ±500 Bias for Models F70 to F121
Switching Frequency	25		125	kHz	Stable frequency over entire output voltage range.
Construction	Case material is black anodized aluminum. UL 94 V-0 rated solid vacuum encapsulation.				
Mean Time Between Failure	810			kHrs	Bellcore TR 332

0 to 12,000V	0.83mA	0 to 15V	<2.5%	F121
0 to +/-6000V	0.83mA	0 to 15V	<2.5%	F121CT

### Notes

1. All orderable part numbers are listed above.
2. CT indicates dual output, center tap.
3. H suffix indicates drilled mounting holes for F01 to F60.
4. R suffix is used as a RoHS indicator for legacy models.

### Mechanical Details

#### F01 - F60

#### F80 - F121

Pin #	Function
1	(+) Input
2	(-) Input
3	(+) Output
4	(-) Output
5	Dual Output/Center Tap (Optional)

#### Notes

- All dimensions are in inches (mm)
- Weight 5oz (142g)
- Tolerance: X.XX±0.02 (0.51)
- Pin Tolerance: ±0.005 (0.127)
- Case is internally connected to (-) Input.
